4-Stroke

300V 4T FACTORY LINE 15W50

15W50**SPECIFICATIONS****Product**

300V 4T FACTORY LINE 15W50

Feature

Double Ester, 100% Synthetic.
For more power and reliability.

SAE/DOT Standard

15W50

Specification

API SL & JASO MA

Maker's Approval

—

Compatibility

All 4-stroke motorcycle engines — racing bikes, very high temperature & rpm, off-road rally, trails and street use.

Double Ester Technology for Motorcycle Engine. This technology made possible to spur on an optimum output by reducing the friction of the oil film while maintaining stable oil pressure. On the other hand, the slippage of the clutch system is minimized by the increased friction between the clutch plates, this then enables the power output to be increased at the rear tire. Improved power output and more reliability at the same time.

15W50 is for race engines running at very high temperature & rpm, speed/endurance/motocross, optimum performance during the race.
