Product

DOT 4 BRAKE FLUID

Feature

Glycol-based and 100% synthetic, DOT 4 BRAKE FLUID enables an effective brake even under extreme conditions. The high dry boiling point is 245°C and the high wet boiling point is 158°C. Suitable for all types of hydraulic actuated-brake and clutch systems.

SAE/DOT Standard

FMVSS 116 DOT 4, DOT 3 & SAE J1703

Specification

Maker's Approval

Compatibility

All types of hydraulic actuated brakes and clutch systems (not to be used with silicon-based and mineral-based brake fluids).
