DOT 5.1 BRAKE FLUID

Non-silicone based, long life and 100% synthetic, DOT 5.1 BRAKE FLUID conforms to the highest standards in brake fluid performance. DOT 5.1 is specially designed for Anti-Locking Brake Systems (ABS). With a high dry boiling point of 270°C and a high wet boiling point of 185°C, DOT 5.1 delivers the best brake performance.

SPECIFICATIONS

Product

DOT 5.1 BRAKE FLUID

Feature

100% synthetic, polyglycol-based. Specially designed for anti-locking brake system (ABS).

SAE/DOT Standard

FMVSS 116, DOT 5.1, DOT 4, DOT 3 & SAE J1703

Specification
—**Maker's Approval**
—**Compatibility**

All types of hydraulic actuated brakes and clutch systems (not to be used with silicon and mineral-based brake fluids).
