

Gears

GEARBOX**80W-90**

A lubricant formulated for gearboxes and axles, GEARBOX contains molybdenum disulphide that reduces deposits and maintains performance even under heavy loads. Recommended for noisy gearboxes, GEARBOX provides high oil film resistance even under the most severe conditions.

SPECIFICATIONS**Product**

GEARBOX

Feature

A multigrade mineral lubricant that contains molybdenum bisulphide for high resistance qualities.

SAE/DOT Standard

80W-90

Specification

API GL4/GL5 & MIL-L-2105D

Maker's Approval**Compatibility**

All gearboxes without wet clutches & hypoid rear axles without LSD.
